

Camera Modules

THE R200 ENCLOSURE

KEY FEATURES

HIGH-SPEED DATA

ADVANCED IMAGE PROCESSING

HARDWARE MODULARITY

Light, robust, and easy to operate, the Camera Module line from Telops is specifically designed for integration into complex optical systems. Available in MWIR or LWIR spectral bands, the Telops Camera Module line allows for the acquisition of highly contrasted images in a wide variety of applications including process control, monitoring thermal behavior of manufactured parts, or surveillance and reconnaissance measurements.

Camera Modules

Urban Area Surveillance

Urban Area Surveillance

SPECIFICATIONS	R200 M	R200 L
Detector Type	MCT	MCT
Spectral Range	3.7 μm to 4.8 μm (1.5 μm to 5 μm F/3 optional)	7.7 μm to 9.3 μm
Spatial Resolution	640 x 512 pixels	640 x 512 pixels
Detector Pitch	15 μm	15 μm
Aperture Size	F/2 or F/4	F/2
Frame Rate	Tunable, max 210 Hz	Tunable, max 230 Hz
Typical NETD	< 25 mK	< 25 mK
Cooler MTBF	10 000 hrs	10 000 hrs
Weight without Enclosure	4 kg	4 kg
Lens Mount	Bayonet	Bayonet

INCLUDES

Real-time data output: RAW, NUC, temperature
 Camera control: GigE, Camera Link™, RS232 (command line only)
 Data transfer: GigE (frame rate limitations may apply), Camera Link™
 Digital video output: HD-SDI
 Customer calibration management tools
 Advanced triggering functionalities
 Real-time processing (RTP-NUC)
 Telops Automatic Exposure Control (AEC)

OPTIONS

24 VDC Power Supply
 Camera Link™ frame grabber board
 3-m Camera Link™ cable
 Motorized filter wheel (4-position), user-removable 25.4-mm diameter filters, up to 2-mm maximum thickness

DELIVERABLES

Command & Control S/W
 Optical head
 Documentation and ICD
